Gemiddeld

Reflection in The Narrowest Piece of the Netherlands
'The Narrowest Piece of the Netherlands, wide enough to fully enjoy'. That is how the municipality of Echt-Susteren presents itself because of its unique location. Literally where the Netherlands is narrowest, between Belgium and Germany, it is no wider than 4.8 kilometers.
Here, plenty of attention is paid to quality of life, relaxation and reflection. This is where this reflection cycle route comes in handy. The reflection cycle route is split into two loops and is largely based on the well-known cycle junction system. Along the way you will come across different stories, museums and relics.
