

# Wandelroute Eijsden-Margraten - Sporen van vuursteen in het landschap

 **Walking route**  
→ **22.6 km**

## Start- and endpoint

Brandwegske / Voerenweg in Rijckholt

## Level of difficulty

Moeilijk

This challenging and long walking route, also known as the flint route, will not disappoint you. This route connects the various flint extraction sites in Eijsden-Margraten.

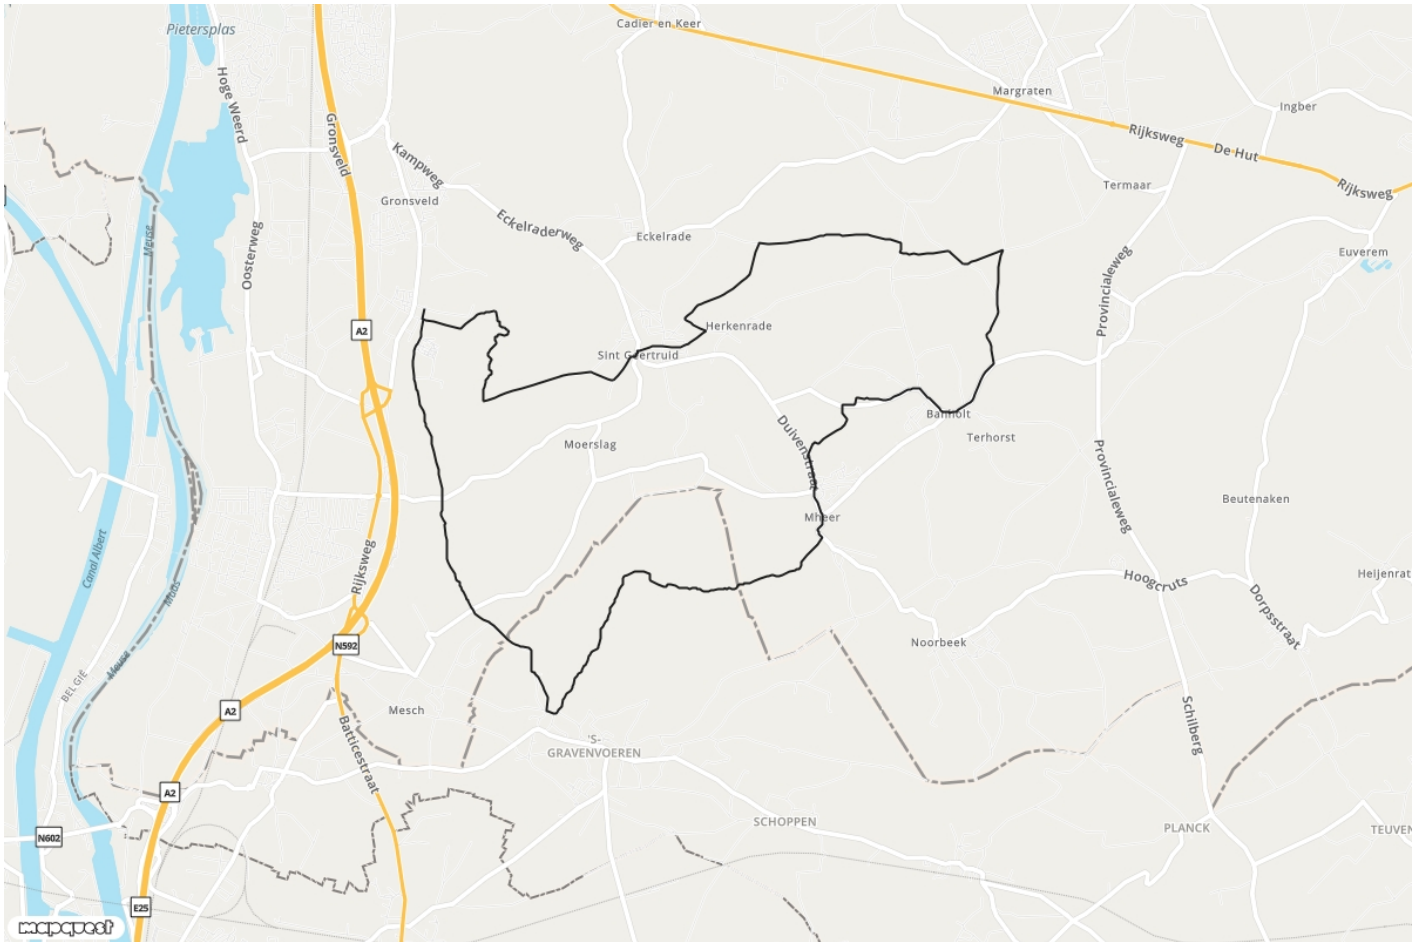

Flint can be found everywhere in the landscape and it is also frequently used in the buildings in this region. Flint was the gold of prehistoric man, essential for the development of mankind.

This route is at the same time an educational tour through the rich landscape with its geological and prehistoric significance. You can park at one of the many parking facilities in Eijsden.

Please note: this walking route can only be walked with an overview map or GPX.
