Natuurroute langs Meers en Maasband

Walking route
13.5 km

Start- and endpoint
Dijkweg in Meers

Level of difficulty
Makkelijk

Between the Juliana Canal and the fast-flowing Maas lies a beautiful, water-rich nature reserve. From the banks of the imposing river you look out over the gravel banks and to Belgium on the other side.
On the Nature Route you will discover the mysterious monument Woodhenge, where ancient, almost black tree trunks claw at the air and symbolize the power of nature.
Activities Project Grensmaas
The work around Maasband will affect the course of this route. Due to the work, the situation in the field can differ from month to month. The green posts along the way will be adapted to the changing circumstances!
