Level of difficulty Makkelijk

Welcome to Geleen! This city takes you on a journey and along the way reminisces about its unique origins, the stormy growth and the hardworking inhabitants. In the past, it used to be thousands of miners who mined coal from the State Mine Maurits en masse. They lived in so-called colonies (miners' quarters) and after the service there was plenty to do in the city... and still do! During this walk, Geleen tells you stories about a metropolis.
