Welcome to beautiful South Limburg and in particular the municipality of Beek. You will certainly have noticed that the surroundings of Beek and South Limburg have a fantastic landscape. But did you also know that the Meuse used to flow towards Aachen and has (had) a great influence on this landscape? Not only the various quarries in the region tell us an incredible amount about the history of South Limburg, but also the stones that you can encounter during your trip through the field. We challenge you to take in nature. The riding stables and activities around horse riding make Beek an equestrian community.
