

Beekdalroute SC09

Schinnen

 **Walking route**
→ **7.1 km**

Start- and endpoint
Thullerkerkweg , 6365
Schinnen, Netherlands

Level of difficulty
Makkelijk

When you think of the hamlet of Thull and the village of Schinnen, you think of the Alfabrewery and the Cansisius syrup factory. However, this area offers more: a beautiful hiking route through the million-year-old plateau landscape. For example, the Beekdal route takes you along the beautiful natural Mulderplas, where you can also start with this route. From there you follow the violet (ring) posts and look out over the Geleenbeek valley, the Mijnspoorpad and the chapels, of which the Mariakapel on the Krekelberg is the most beautiful. Along the way there are more than enough rest areas and restaurants for a snack and drink.
