This walking route from Cadier en Keer to the edge of Maastricht shows you the picturesque landscape and the fairytale sculpture garden Heerdeberg. This sculpture garden, located in a magical environment of trees and marl, not only shows you the most imaginative images, but you can also taste delicious regional products as an interruption of your walking route. When you walk further, you become acquainted with the high and low differences that you only encounter in the South Limburg hills. Park the car at the golf course or in Cadier en Keer and follow the black posts.
