## Level of difficulty

Moeilijk

The Krijtlandpad is perhaps the king of the South Limburg walking routes. The totally renewed route is now 91 kilometers long, has six stages and more than sixty percent is on unpaved roads. During this route you will pass the most beautiful places that South Limburg has to offer.

It is a valley landscape, created millions of years ago by rivers that made their way through the Cretaceous Plateau. This created a landscape with an abundance of valleys, steep slopes and meandering streams. And with a special flora and fauna. It is a challenging route with sunken roads, wet stream valleys, picturesque villages and unique hillside forests. And of course with regular rise and fall.
